

Decision Statements

aka If Statements

Decision Statements

- Are a form of **control** statements
- They control which code is run at which times
- In java, the most common form is an **if** structure.

An If Statement

```
var num = promptNum ("Enter a level >");
```

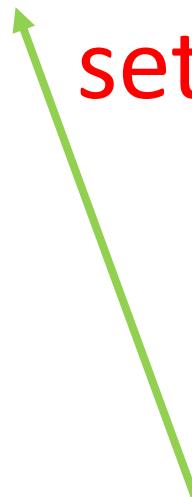

```
if (num >= 2)  
    setText("answer", "pass");
```

An If Statement

```
var num = promptNum ("Enter a level >");
```

```
if (num >= 2)
```

```
    setText("answer", "pass");
```

Keyword for an if...

An If Statement

```
var num = promptNum ("Enter a level >");
```

```
if (num >= 2) ←  
    setText("answer", "pass");
```

Boolean
Expression
If true, the
statement runs.

Keyword for an if...

An If Statement

```
var num = promptNum ("Enter a level >");
```

```
if (num >= 2) ←  
    setText("answer", "pass");
```

Boolean
Expression
If true, the
statement runs.

Code to run if true

Keyword for an if...

An If Statement

```
var num = proc Enter a level >");
```

```
if (num >= 2) ←  
    setText("answer", "pass");
```

No semi-colon!

Boolean Expression
If true, the statement runs.

Code to run if true

Keyword for an if...

An If/Else Statement

```
var num = promptNum ("Enter a level >");
```

```
if (num >= 2)
    setText("answer", "pass");
else
    setText("answer", "fail");
```

Default = else.

If not the first one, then run this one.

An If/Else Statement

```
var num = promptNum ("Level >");  
  
if (num >= 2)  
    setText("answer", "pass");  
else  
    setText("answer", "fail");
```

lvl	Printed?
7	

An If/Else Statement

```
var num = promptNum ("Level >");

if (num >= 2)
    setText("answer", "pass");
else
    setText("answer", "fail");
```

lvl	Printed?
7	Pass
1	

An If/Else Statement

```
var num = promptNum ("Level >");

if (num >= 2)
    setText("answer", "pass");
else
    setText("answer", "fail");
```

lvl	Printed?
7	Pass
1	Fail
2	

An If/Else Statement

```
var num = promptNum ("Level >");

if (num >= 2)
    setText("answer", "pass");
else
    setText("answer", "fail");
```

lvl	Printed?
7	Pass
1	Fail
2	Pass
-3	

An If/Else Statement

```
var num = promptNum ("Level >");

if (num >= 2)
    setText("answer", "pass");
else
    setText("answer", "fail");
```

lvl	Printed?
7	Pass
1	Fail
2	Pass
-3	Fail
81	

An If/Else Statement

```
var num = promptNum ("Level >");

if (num >= 2)
    setText("answer", "pass");
else
    setText("answer", "fail");
```

lvl	Printed?
7	Pass
1	Fail
2	Pass
-3	Fail
81	Pass

If/Else if/Else

```
var num = promptNum ("Level >");  
if (num == 4)  
    setText("answer", "Outstanding");  
else if (num >=3)  
    setText("answer", "Great Work");  
else if (num>=2)  
    setText("answer", "Satisfactory");  
else  
    setText("answer", "Come for extra help");
```

In an if/else if structure, the FIRST true statement is run and then it skips to the end.

Nothing else is run once one is true.

If/Else if/Else

```
var num = promptNum ("Level > ");
if (num == 4)
    setText("answer", "Outstanding");
else if (num >=3)
    setText("answer", "Great Work");
else if (num>=2)
    setText("answer", "Satisfactory");
else
    setText("answer", "Come for extra help");
```

}
```

Multi-line Ifs

Multi-line ifs require
{ } to set up a region
of code.
