Printing out text slowly
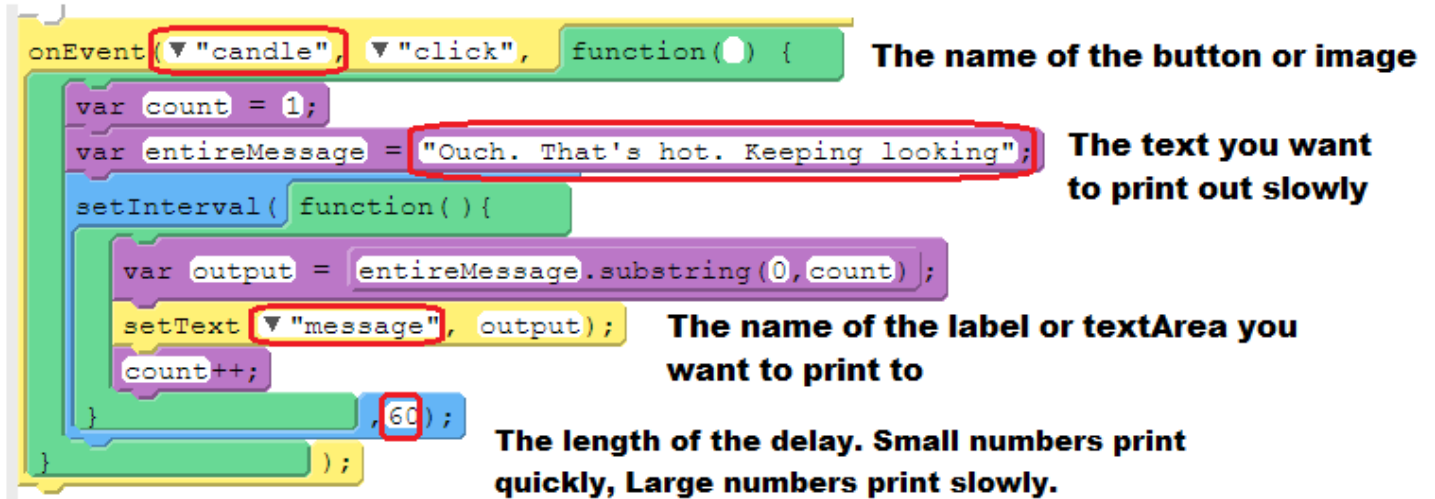

Please use this sparingly. It is annoying when used in large quantities or on all screens.

The name of the button or image

The text you want to print out slowly

The name of the label or textArea you want to print to

The length of the delay. Small numbers print quickly, Large numbers print slowly.

In text format (to cut and paste):

```
onEvent("candle", "click", function( ) {
    var count = 1;
    var entireMessage = "Ouch. That's hot. Keeping looking";
    setInterval(function(){
        var output = entireMessage.substring(0,count);
        setText("message", output);
        count++;
    },60);
});
```
